Professional Summary

I am an Energy Systems Engineer with a good experience in engineering management, process optimization and data-driven decision support. At Danfoss, Dogus Energy, Emas Machine Industry and Propenta, I managed to obtain quantifiable efficiency, project management, and energy performance outcomes. I am in the process of my masters in Engineering management in Berlin. I apply a mix of technical and analyzational skills to provide a solution to the challenge of sustainable energy through the deployment of Power BI and Python.

Work Experience

Production Engineering Trainee

Emas Machine Industry | Apr 2024 - May 2024

- Adopted process analysis which enhanced the efficiency of production by 12%, which eliminated wastage and reduced down time.
- Worked with production teams to streamline processes, using lean process improvement and reporting tools based on data.
- Assured complete adherence to energy efficiency requirements, which will help to measure real safety and quality KPIs.
- Guided the project life cycle design to quality control, making sure that 100 percent standard in the industry was met.
- New steps of process optimization that led to a decrease in manufacturing defects by 8%.

Long-Term Project Engineer Trainee

Propenta Steel Industry | Manisa - Turkey | Apr 2023 - Dec 2023

- Full cross-functional cooperation with 3 departments, reduced the project delivery time by 10%.
- Carried out data collection and research analysis, designed the reports that were used in decision-making on the engineering projects.
- Improved project management through incorporation of reporting tools as well as suggesting standardization of the processes.

Long-Term Sales Engineer Trainee

Danfoss Turkey | Istanbul - Turkey | Oct 2022 - Apr 2023

- Gave 10 or more product presentations and assisted clients in their data visualization tools to demonstrate technical concepts.
- Brings specialized technical contribution to enhance the decision-making process of the clients, which is in line with business intelligence practices.
- Liaised with the sales team in order to streamline reporting dashboards in harmony with business intelligence practices.

Production Planning and Optimization Trainee

Dogus Energy | Istanbul - Turkey | Aug 2022 - Sep 2022

- Extracting, cleansing and transforming data that is applied to enhance production reports and planning.
- Reduced the planning error by 7 percent through the use of Excel VBA macros and reporting tools.
- Collaborated with production teams to simplify business, helped with lean and optimization of operations.

Education

MSc. in Engineering Management

Berlin School of Business and Innovation | Berlin, Germany | 2025 - Present

BSc. in Energy Systems Engineer

Bahcesehir University | Istanbul, Turkey | 2018 - 2024

Language education, English

Bay Atlantic University | Washington D.C., USA | 2018 - 2019

High School Diploma

Doga College | Izmir, Turkey | 2014 - 2018

Projects / Academic Projects

Pressure Vessels Projects | 2023 - 2024

- Finished, controlled information-based processes, reduced time of production by 10%.
- Co-ordinated working teams and consolidated reporting tools to standardize operations.

Conveyor Systems | 2023 - 2024

- Solving practical problems and enhancing processes through visualization of technical documentation and incorporation of technology development practices.

The Relationship Between Electricity Market Clearing Price (PTF) and the Market Value of Energy Companies (Graduation Project Dec.) | 2022 - 2023

- Carried out statistical analysis of electricity prices (PTF) and business value and found a correlation of 85 percent.
- Developed information pipelines to process and retrieve financial/energy data to support business intelligence dashboards.
- Used business intelligent tools to find out the correlations to enhance the understanding of the energy market innovation.

Skills

- **Data Analytics/Visualization:** Power BI (advanced), excel (pivot, VBA Macros), Snapshot reporting.
- **Programming and Data:** Python (Pandas, NumPy), SQL (basic), Data Structures, Data Pipelines, Data Cleansing and Transformation.
- **Engineering and Energy:** Energy Technology, industrial engineering, Siemens tools exposure, Siemens Industrial Technology applications, Energy Sector applications.
- **Business and ERP Tools:** SAP Data Cloud, Office 365 (Teams, SharePoint, PowerPoint) Administrative Processes.
- **Global & Intercultural Experience:** Global Team work, International Company projects, Technical Environments.
- **Soft Skills:** Time Management, Organization, International Teamwork, Communication, Cooperation, Perceptiveness, Self-reliant, Trustworthy, Driven, Enthusiastic, Dedicated.

Certifications

Quality Management Programme (TÜV Austria) | Feb 2025

- Training in ISO 14001, 9001, 45001, 10002, 19011 (Internal Auditor).
- Focus on process management, quality documentation, system integration and internal auditing.
- Enhanced ability in problem-solving, process improvement and decision support.

Languages

Turkish: C2 (Native)

English: Upper-Intermediate (B2)

German: A1 (Beginner, A2 in progress)
